*LIABILITY INSURANCE* JAGENDRA RANA,2023-12-20 Liability insurance is a part of the general insurance system of risk financing to protect the purchaser from the risks of liabilities imposed by lawsuits and similar claims and protects the insured if the purchaser is sued for claims that come within the coverage of the insurance policy. Liability insurance has become a much talked about subject and is receiving well deserved attention of the people both on the supply and demand side in India and also worldwide. Events and legislations in the recent past have kept this area in the limelight thanks to the media coverage and some significant legal pronouncements. Liability insurance market is less crowded. There is a dearth of technically talented and trained resources to deal with all aspects of underwriting and claims of this insurance. Liability insurance is a general term to describe different types of insurance coverage that helps protect you or your business. Demand for liability insurance is bound to grow in the times to come.

Women's Empowerment Within the Tourism Industry Bayram, Gül Erkol,Shah, Syed Haider Ali,Tunio, Muhammad Nawaz,2023-08-01 In recent decades, more women around the world have taken the opportunity to enter the market, join the workforce, and start their own entrepreneurial ventures. These changes have had a strong impact on market demographics. Particularly within the tourism industry, it is important to investigate the behavior, motivations, experiences, and needs of women as travelers, employees, and entrepreneurs. Women's Empowerment Within the Tourism Industry offers a conversant and comprehensive overview of the themes and concepts of women as tourists, employees, and entrepreneurs in tourism. Providing interdisciplinary insights from leading international researchers and academicians, this book makes a critical contribution to the knowledge of women's participation within the tourism industry. It discusses the nature of their work and ways in which tourism creates tension between the attitudes and conduct of tourists and the beliefs and behavior of local women. Covering topics such as consumer experience, gender studies, and women's employment, this premier reference source is an excellent resource for business leaders and managers, entrepreneurs, marketers, government officials, students and educators of higher education, librarians, researchers, and academicians.

Buddhist Approach to Harmonious Families, Healthcare and Sustainable Societies Thich Duc Thien,Thich Nhat Tu,2019-04-16 EDITORS' INTRODUCTION BACKGROUND There have been major changes in world today and that the term Global Leadership and Sustainable Development is no longer taken for granted as a point of reference for understanding the

contemporary chaotic situation. These disruptive changes mean that it is now arguable as to whether we still live in a world of justice, equality, peace and prosperity. The nature of these changes and the concepts of the Buddhist approach are central to the whole project of this book. In this light, we place great emphasis on understanding Buddhist teaching in dealing with this matter. We argue that any investigation of the changing character and context of the present time, needs to take account of the Buddhist philosophy. We focus on providing a thorough and critical understanding of change taking place as a starting point of discussion. In doing so, we attempt to clarify the nature of the Buddhist approach. It may be more productively understood as the result of a complex contested and fragile set of arrangements, which in this book we term as “approach”. We do not imply that the frameworks based on the Buddhist teachings are fully fixed and agreed by everybody. Rather it would refer to a set of arrangements that need to be further discussed. Given the above, this volume collects together papers presented at the international workshop on Buddhist Approach to Harmonious Families, Healthcare and Sustainable Societies which took place on 13 May 2019 at International Conference Center Tam Chuc, Ha Nam, Vietnam on the occasion of THE 16TH UNITED NATIONS DAY OF VESAK CELEBRATIONS 2019. The participants in this workshop were not representative of the mainstream thinking or conventional wisdom of this field, although this volume reflects this richness and diversity. Treating the Buddha teachings as a basic theoretical reconstruction, we examine the relationships between the societies and Buddhist responsibilities. We combine analyses of the conflicts, trends and dynamics affecting future development with more focused studies on a range of policy areas: migration, education, leadership, climate change, etc... Two of our most crucial presumptions are that making Buddhism great again at the time of disruption is our first and foremost duty and the Buddhist responsibility can contribute to creating a new foundation for Global Leadership and Sustainable Development.

**Law Enforcement in the Age of Black Lives Matter** Sandra E. Weissinger, Dwayne A. Mack, 2017-12-29 There is a reason why people claim great respect for officers of the law: the job, by description, is hard—if not deadly. It takes a certain kind of person to accept the consequences of the job— seeing the very worst situations, on a regular basis, and knowing that one’s life is on the line every hour of every day. Working in law enforcement is emotionally and psychologically draining. It affects these public servants both on and off the job. Said plainly, shaking an officers’ hand when you see them or posting a sign in the front yard that reads “Support the Badge” is lip service. Even going as far as to donate money to a crowdsourcing fundraising site does little to support the long-term professional development needs of officers. These are surface level signs of solidarity, and do little in terms of showing respect for the job and those who do it. For those who want to do more, this text provides reasons and a rationale for doing better by these public servants. Showing respect does not mean that one agrees with whatever another person or institution claims to be the “right” way. Showing respect and admiration means that we charge individuals to live up to their fullest potentials and integrate innovation wherever possible. In the case of policing

in the era of Black Lives Matters, policing as usual simply is not an option any longer. It is disrespectful, to both the officers and those who are being policed, to rest on the laurels of past policing tactics. As we enter a time period in which police interactions are recorded (dash cams or body cams, for example) and new populations are being targeted (Latinx people), there is much to learn about what is working and what is not.

*Recent Advances in Control Problems of Dynamical Systems and Networks* Ju H. Park, 2020-08-11 This edited book introduces readers to new analytical techniques and controller design schemes used to solve the emerging “hottest” problems in dynamic control systems and networks. In recent years, the study of dynamic systems and networks has faced major changes and challenges with the rapid advancement of IT technology, accompanied by the 4th Industrial Revolution. Many new factors that now have to be considered, and which haven’t been addressed from control engineering perspectives to date, are naturally emerging as the systems become more complex and networked. The general scope of this book includes the modeling of the system itself and uncertainty elements, examining stability under various criteria, and controller design techniques to achieve specific control objectives in various dynamic systems and networks. In terms of traditional stability matters, this includes the following special issues: finite-time stability and stabilization, consensus/synchronization, fault-tolerant control, event-triggered control, and sampled-data control for classical linear/nonlinear systems, interconnected systems, fractional-order systems, switched systems, neural networks, and complex networks. In terms of introducing graduate students and professional researchers studying control engineering and applied mathematics to the latest research trends in the areas mentioned above, this book offers an excellent guide.

*Crafting History* Albena Yaneva, 2020-11-15 What constitutes an archive in architecture? What forms does it take? What epistemology does it perform? What kind of craft is archiving? *Crafting History* provides answers and offers insights on the ontological granularity of the archive and its relationship with architecture as a complex enterprise that starts and ends much beyond the act of building or the life of a creator. In this book we learn how objects are processed and catalogued, how a classification scheme is produced, how models and drawings are preserved, and how born-digital material battles time and technology obsolescence. We follow the work of conservators, librarians, cataloguers, digital archivists, museum technicians, curators, and architects, and we capture archiving in its mundane and practical course. Based on ethnographic observation at the Canadian Centre for Architecture and interviews with a range of practitioners, including Álvaro Siza and Peter Eisenman, Albena Yaneva traces archiving through the daily work and care of all its participants, scrutinizing their variable ontology, scale, and politics. Yaneva addresses the strategies practicing architects employ to envisage an archive-based future and tells a story about how architectural collections are crafted so as to form the epistemological basis of architectural history.

**Educational Foundations** Brian W. Dotts, 2019 This educational foundations book offers a comprehensive overview of

American education history and a variety of classical, Enlightenment, and contemporary educational philosophers. While Educational Foundations includes a history of American education, it also looks at numerous policies, constitutional law cases, events, and political, religious, and social conflicts for students to consider while learning their subject matter. The text is divided into two sections: the first is a look at a broad array of philosophical influences from the Western canon, while the second is an exploration of the history of American education, focusing on a few specific eras. With strong and helpful pedagogical features and resources, such as class activities, suggested files, chapter objectives, and sidebar questions, this textbook is an excellent resource for students. It is useful for undergraduate and graduate courses in educational foundations.

**Structure Reports** W.B. Pearson, 2013-06-29 This Cumulative Index of Structure Reports is for the years 1961 to 1970 (Vols. 26 to 35). The Subject Index is arranged in strict alphabetical succession regardless of the construction of words, although in the listing of organic compounds certain prefixes such as mono, 0-, m-, p-, D and L are disregarded. Nevertheless, some inconsistencies in the rendering of these prefixes and others such as trans, cyclo and iso remain, and where a name is sought which contains these, it should be searched for both with and without regard for the prefix. The Formula Index which lists Metals and Inorganic substances, is arranged in alphabetical order of chemical symbols. Organic compounds are listed in the Index of Carbon Compounds, which is indexed first by C, then H with other elements following in alphabetical order of chemical symbols. A carbon compound not appearing in this Index should also be sought in the Formula Index. The scheme usually employed for the transliteration of Russian is given below. w. B. *Australia in the US Empire* Erik Paul, 2018-04-27 This book argues that Australia is vital to the US imperial project for global hegemony in the struggle among great powers, and why Australia's deep dependency on the US is incompatible with democracy and the security of the country. The Australian continent is increasingly a contestable geopolitical asset for the US grand strategy and for China's economic and political expansionism. The election of Donald Trump to the US presidency is symptomatic of the US hegemonic crisis. The US is Australia's dangerous ally and the US crisis is a call for Australia to regain sovereignty and sever its military alliance with the US. Political realism provides a critical paradigm to analyse the interactions between capitalism, imperialism and militarism as they undermine Australian democracy and shift governmentality towards new forms of authoritarianism.

*Conflict Resolution Using the Graph Model: Strategic Interactions in Competition and Cooperation* Haiyan Xu, Keith W. Hipel, D. Marc Kilgour, Liping Fang, 2018-05-11 This cutting-edge book presents the theory and practice of the Graph Model

for Conflict Resolution (GMCR), which is used for strategically investigating disputes in any field to enable informed decision making. It clearly explains how GMCR can determine what is the best a particular decision maker (DM) can independently achieve in dynamic interaction with others. Moves and counter-moves follow various stability definitions reflecting human behavior under conflict. The book defines a wide range of preference structures to represent a DM's comparisons of states or scenarios: equally preferred, more or less preferred; unknown; degrees of strength of preference; and hybrid. It vividly describes how GMCR can ascertain whether a DM can fare even better by cooperating with others in a coalition. The book portrays how a conflict can evolve from the status quo to a desirable resolution, and provides a universal design for a decision support system to implement the innovative decision technologies using the matrix formulation of GMCR. Further, it illustrates the key ideas using real-world conflicts and supplies problems at the end of each chapter. As such, this highly instructive book benefits teachers, mentors, students and practitioners in any area where conflict arises.

*Serious Farm* Tim Egan, 2006-10-02 Farmer Fred never smiled much. "Farmin' is serious business," he'd say. "Nothin' funny about corn." And so life on his farm was pretty serious. None of the animals laughed or even smiled. But everyone has to laugh sometimes, including Farmer Fred. The animals try everything to get him to smile: dancing by the light of the moon in Farmer Fred's clothes, singing chickens, sheep disguised in sunglasses and mustaches. Nothing works and finally the animals decide to leave Serious Farm in search of a more cheerful place to chuckle and graze. Will the animals find a livelier home, and will Farmer Fred ever lighten up?

*The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation* Ilan Kelman, Jessica Mercer, JC Gaillard, 2017-09-19 The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation aims to provide an overview and critique of the current state of knowledge, policy, and practice, encouraging engagement, and reflection on bringing the two sectors together. This long-awaited and welcomed volume makes a compelling case that a common research agenda and a series of practical policies and policy recommendations can and should be put in place. Over 40 contributions explore DRR including CCA in five parts. The first part presents and interrogates much of the typical vocabulary seen in DRR including CCA, not only pointing out the useful and not-so-useful dimensions, but also providing alternatives and positive examples. The second part explains how to move forward creating and supporting positive crossovers and connections, while the third one explores some aspects of multi-dimensional approaches to knowing and understanding. The fourth part argues for a balanced approach to governance, taking both governmental and non-governmental governance, as well as different scales of governance, into consideration. The final part of the Handbook emphasises DRR including CCA as an investment, rather than a cost, and connects its further implementation with livelihoods of people around the world. This handbook highlights the connections amongst the processes of dealing with disasters and dealing with climate change. It demonstrates how little climate change brings which is new and emphasises the

strengths of placing climate change within wider contexts in order to draw on all our strengths while overcoming limitations with specialities. It will prove to be a valuable guide for graduate and advanced undergraduate students, academics, policy makers, and practitioners with an interest in disaster risk reduction and climate change.

**Advanced Synchronization Control and Bifurcation of Chaotic Fractional-Order Systems** Boulkroune, Abdesslem, Ladaci, Samir, 2018-05-11 In the recent years, fractional-order systems have been studied by many researchers in the engineering field. It was found that many systems can be described more accurately by fractional differential equations than by integer-order models. *Advanced Synchronization Control and Bifurcation of Chaotic Fractional-Order Systems* is a scholarly publication that explores new developments related to novel chaotic fractional-order systems, control schemes, and their applications. Featuring coverage on a wide range of topics including chaos synchronization, nonlinear control, and cryptography, this publication is geared toward engineers, IT professionals, researchers, and upper-level graduate students seeking current research on chaotic fractional-order systems and their applications in engineering and computer science.

Inside Private Prisons Lauren-Brooke Eisen, 2017-11-07 When the tough-on-crime politics of the 1980s overcrowded state prisons, private companies saw potential profit in building and operating correctional facilities. Today more than a hundred thousand of the 1.5 million incarcerated Americans are held in private prisons in twenty-nine states and federal corrections. Private prisons are criticized for making money off mass incarceration—to the tune of \$5 billion in annual revenue. Based on Lauren-Brooke Eisen’s work as a prosecutor, journalist, and attorney at policy think tanks, *Inside Private Prisons* blends investigative reportage and quantitative and historical research to analyze privatized corrections in America. From divestment campaigns to boardrooms to private immigration-detention centers across the Southwest, Eisen examines private prisons through the eyes of inmates, their families, correctional staff, policymakers, activists, Immigration and Customs Enforcement employees, undocumented immigrants, and the executives of America’s largest private prison corporations. Private prisons have become ground zero in the anti-mass-incarceration movement. Universities have divested from these companies, political candidates hesitate to accept their campaign donations, and the Department of Justice tried to phase out its contracts with them. On the other side, impoverished rural towns often try to lure the for-profit prison industry to build facilities and create new jobs. Neither an endorsement or a demonization, *Inside Private Prisons* details the complicated and perverse incentives rooted in the industry, from mandatory bed occupancy to vested interests in mass incarceration. If private prisons are here to stay, how can we fix them? This book is a blueprint for policymakers to reform practices and for concerned citizens to understand our changing carceral landscape.

*The Value of Commercial Marine Shipping to Canada* The Expert Panel on the Social and Economic Value of Marine Shipping to Canada, 2017-05-25 *The Value of Commercial Marine Shipping to Canada* is a comprehensive, high-quality, independent study that examines the broad impacts of marine shipping to Canada, addressing national, regional, and local

issues. It is the first of its kind to examine “value” as including cultural, environmental, and security dimensions, in addition to economic measures. It is intended to contribute to a national dialogue and serve as a tool to help inform policy decisions related to marine shipping in Canada.

**Conciliation and Mediation in India** Gracious Timothy Dunna, 2022-02-15 Global Trends in Dispute Resolution Series, Volume 11 It can be said that negotiation is about what to do, whereas mediation is about how to do it—how to make sure control is in the hands of the disputants. Although mediation (as well as conciliation) is taking hold in dispute resolution worldwide, among the nations, India shows the strongest signs of interest in developing a pervasive legal mediation culture. In this invaluable book, more than 20 formidable thought leaders with global reputations in dispute resolution describe how mediation is used, and can be used, to resolve different types of disputes in India and international cases. With a focus throughout on the law and procedure applicable to conciliation and mediation in India—addressing the involvement of each of the stakeholders in the process (with relevant hints on practice)—the contributors examine such issues and topics as the following: mediator ethics; court-annexed mediation; institutional mediation; mediating commercial disputes; mediating company, insolvency, and bankruptcy disputes; mediating government disputes; mediating investor-state disputes; mediating family disputes; e-mediation; community mediation and citizen empowerment; mixed-mode dispute resolution; and cross-border enforcement of mediated settlements. Two practice-oriented chapters synthesize the process, techniques, and approaches that experienced mediators and mediation advocates have found to be most valuable in their preparation for a mediation. Included is a detailed commentary on Part III of the Arbitration and Conciliation Act 1996 and the 2018 Singapore Convention on Mediation. There is little doubt that mediation is the dispute resolution choice of the next-generation lawyer. Present-day lawyers, judges, and users are becoming increasingly convinced that early conflict resolution through facilitated negotiations avoids the pitfalls of adversarial modes of dispute resolution, especially in terms of user satisfaction. This book takes into account where India stands at present, covering statutes, international conventions, and academic literature, thus bequeathing a broad understanding of the subject for legal practitioners, judges, arbitrators, mediators and conciliators, users, and technical experts who wish to understand it.

**Education in China and the World** Liu Niancai, Feng Zhuolin, Wang Qi, 2024-02-02 This open access book provides a comprehensive overview of education in China, covering 12 critical topics including basic education, higher education, professional education, STEM (Science, Technology, Engineering, and Mathematics) education, mental health education, and international education and excellence initiatives. Drawing from current research, theoretical literature, and real-life stories, this book examines the developmental trajectories, achievements, and best practices in the above-mentioned topics, to reflect realities of education transformation in China. It also incorporates a global comparison of key indicators to explore strengths of and gaps in Chinese education with its global counterparts. Setting its context in an ever-changing world, this book

intends to explore conceptual support to develop “a modern education system with Chinese features and world standards”, to provide implications for further developing quality education in all sectors, and to promote understanding and inspire critical discussion on education development in China and around the world. This book serves as a valuable resource for students, scholars, and policy makers in the field of education studies, as well as for the general public who are interested in Chinese education.

**Energy and Environmental Aspects of Emerging Technologies for Smart Grid** Surender Reddy Salkuti, 2024 This book presents mathematical models of various renewable energy sources (RESs) such as wind energy systems, solar PV systems, battery energy storage systems, pumped-storage hydropower, biomass, and electric vehicles (EVs). It also discusses the challenging task of the integration of high penetration of renewable energies and EVs within existing power systems. The uncertainty related to RESs, electric vehicle charging, and load demands is also modelled. The book provides illustrative and comprehensive practical case studies to enable a complete understanding of the proposed methodologies. This book will consider the nuances of all these new paradigms, smart grid components, technology, and the impact of energy storage, EVs, and distributed energy resources, in the power networks.
