**Heroes** Tobias R  ther,2014-11-15 In 1976, David Bowie left Los Angeles and the success of his celebrated albums Diamond Dogs and Young Americans for Europe. The rocker settled in Berlin, where he would make his “Berlin Trilogy”—the albums Low, Heroes, and Lodger, which are now considered some of the most critically acclaimed and innovative of the late twentieth century. But Bowie’s time in Berlin was about more than producing new music. As Tobias R  ther describes in this fascinating tale of Bowie’s Berlin years, the musician traveled to West Berlin—the capital of his childhood dreams and the city of Expressionism—to repair his body and mind from the devastation of drug addiction, delusions, and mania. Painting a vivid picture of Bowie’s life in the Sch  neberg area of the city, R  ther describes the artist’s friendships and collaborations with his roommate, Iggy Pop, as well as Brian Eno and Tony Visconti. R  ther illustrates Bowie’s return to painting, days cycling to the Die Br  cke museum, and his exploration of the city’s nightlife, both the wild side and the gay scene. In West Berlin, Bowie also met singer and actress Romy Haag; came to know Hansa Studios, where he would record Low and Heroes; and even landed the part of a Prussian aristocrat in Just a Gigolo, starring alongside Marlene Dietrich. Eventually R  ther uses Bowie and his explorations of the cultural and historical undercurrents of West Berlin to examine the city itself: divided, caught in the Cold War, and how it began to redefine itself as a cultural metropolis, turning to the arts to start a new history. Tying in with an exhibition at the Museum of Contemporary Art, Chicago, in September, 2014, Heroes tells the fascinating story of how the music of the future arose from the spirit of the past. It is an unforgettable look at one of the world’s most renowned musicians in one of its most inspiring cities.

**Addiction and Weakness of Will** Lubomira Radoilska,2013-11-28 The way in which society views addiction underlies how it treats, understands, blames, or even punishes those with addictive behaviours. This thought-provoking new book

presents an original philosophical analysis bringing together addiction and weakness of will. Within the book, the author develops an integrated account of these two phenomena, rooted in a classical conception of akrasia as valuing without intending and at the same time intending without valuing. This fascinating and suggestive account addresses a number of paradoxes faced by current thinking about addiction and weakness of will, in particular the significance of control and intention for responsible action. *Addiction and Weakness of Will* makes an original contribution to central issues in moral psychology and philosophy of action, including the relationship between responsibility and intentional agency, and the nature and scope of moral appraisal. The book is valuable for philosophers, ethicists and psychiatrists with an interest in philosophy.

*Insights from Book Translations on the International Diffusion of Knowledge* Isabelle Yin Fong Sin, 2011 Increases in the stock of ideas possessed by societies are central to modern economic growth. The implications of idea flows are striking: Klenow and Rodriguez-Clare (2005) estimate world production would be just 6% of its current level if countries did not share ideas. Yet, although theoretical economists have studied ideas and their diffusion extensively, empirical studies are scarce because ideas are inherently difficult to measure. Previous empirical studies of idea flows have tended to use proxies such as trade flows, foreign direct investment, migration, and patent citations. However, with the exception of the latter, these measures are not pure idea flows, and do not capture the key properties of ideas, namely non-rivalry and disembodiedness. My research proposes a novel measure of idea flows, namely book translations, and uses it to study the factors that affect the international diffusion of ideas. Book translations are an attractive way to quantify idea flows because they are both non-rival and disembodied; they are a pure measure of idea flows rather than a by-product of a process such as trade or migration, and their key purpose is to make the ideas contained in the book accessible to speakers of another language. In chapter 2, I outline the economics literature on ideas and their diffusion. I motivate and discuss book translations as a measure of idea flows, and provide a framework for thinking about when translations are likely to occur. I describe the translation data in chapter 3. The source of the data is an international bibliography of translations collected by the United Nations Educational, Scientific, and Cultural Organization. From this bibliography, I compile a data set of over 2 million translations published in 80 countries since the 1949, including detailed information on each title translated. I then document the main patterns of translation flows. In chapter 4, I employ a gravity framework to study how distance affects translation flows between countries. This sheds light both on the barriers to international idea diffusion and on the underlying causes of the negative

relationship between distance and trade. Translations differ from trade in that they have zero transportation costs, but they are subject to similar search and information costs and costs of forming contracts. I estimate a gravity model where bilateral translation flows vary with the sizes of the countries and the distance between them, and find the elasticity of translations with respect to distance to be between -0.3 and -0.5 for the 1990s; these values are significantly smaller than the equivalent elasticity for trade found in the literature, suggesting a significant role for transportation costs in the distance effect on trade. In addition, I present several pieces of evidence that suggest supply-side frictions play a larger role in the distance effect on translations than do consumer preferences. For instance, the speed with which titles are translated, which is likely to largely capture supply frictions as opposed to demand factors, decreases significantly with distance. Finally, in joint work with Ran Abramitzky (chapter 5), I study how the collapse of the Communist regime in Eastern Europe at the close of the 1980s affected the international diffusion of ideas. We show that while translations between Communist languages decreased by two thirds with the collapse, Western-to-Communist translations increased by a factor of seven and reached Western levels. Convergence was full in economically-beneficial fields such as sciences and only partial in culturally-beneficial fields such as history. The effects were larger for more Western-oriented countries. These findings help us understand how institutions shape the international diffusion of knowledge and demonstrate the importance of preferences in determining the type of ideas that diffuse into a country.

*Zoo Station* Christiane F., 2019-08-01 This incredible autobiography of Christiane F. provides a vivid portrait of teen friendship, drug abuse, and alienation in and around Berlin's notorious Zoo Station. Christiane's rapid descent into heroin abuse and prostitution is shocking, but the boredom, longing for acceptance, thrilling risks, and even her musical obsessions are familiar to everyone. Previously published in Germany and the US to critical acclaim, Zest's new translation includes original photographs of Christiane and her friends.

*House of Psychotic Women* Kier-La Janisse, 2015-01-09 Cinema is full of neurotic personalities, but few things are more transfixing than a woman losing her mind onscreen. Horror as a genre provides the most welcoming platform for these histrionics: crippling paranoia, desperate loneliness, masochistic death-wishes, dangerous obsessiveness, apocalyptic hysteria. Unlike her male counterpart - 'the eccentric' - the female neurotic lives a shamed existence, making these films those rare places where her destructive emotions get to play. *HOUSE OF PSYCHOTIC WOMEN* is an examination of these characters through a daringly personal autobiographical lens. Anecdotes and memories interweave with film history, criticism, trivia and confrontational imagery to create a reflective personal history and a celebration of female madness, both onscreen and off. This critically-acclaimed publication is packed with rare images that combine with family photos and artifacts to form a titillating sensory overload, with a filmography that traverses the acclaimed and the obscure in equal

measure. Films covered include *The Entity*, *Paranormal Activity*, *Singapore Sling*, *3 Women*, *Toys Are Not for Children*, *Repulsion*, *Let's Scare Jessica to Death*, *The Haunting of Julia*, *Secret Ceremony*, *Cutting Moments*, *Out of the Blue*, *Mademoiselle*, *The Piano Teacher*, *Possession*, *Antichrist* and hundreds more. Prior to this ebook edition, Kier-La's highly acclaimed book has already been issued twice in hardcover and twice in paperback, garnering extensive press coverage. Endorsement including the following: "God, this woman can write, with a voice and intellect that's so new. The truth in the most deadly unique way I've ever read." - Ralph Bakshi, director of 'Fritz the Cat', 'Heavy Traffic', 'Lord of the Rings', etc. "Fascinating, engaging and lucidly written: an extraordinary blend of deeply researched academic analysis and revealing memoir." - Iain Banks, author of 'The Wasp Factory'

Seeing Through Multilingual Corpora Stig Johansson,2007-01-01 Through electronic corpora we can observe patterns which we were unaware of before or only vaguely glimpsed. The availability of multilingual corpora has led to a renewal of contrastive studies. We gain new insight into similarities and differences between languages, at the same time as the characteristics of each language are brought into relief. The present book focuses on the work in building and using the English-Norwegian Parallel Corpus and the Oslo Multilingual Corpus. Case studies are reported on lexis, grammar, and discourse. A concluding chapter sums up problems and prospects of corpus-based contrastive studies, including applications in lexicography, translator training, and foreign-language teaching. Though the main focus is on English and Norwegian, the approach should be of interest more generally for corpus-based contrastive research and for language studies in general. Seeing through corpora we can see through language.
